Spring 2018

Date	Speaker	Organization	Title
	Dr. John Swierk		Designing Dye-Sensitized and
2/15/2 018	Associate Research Scientist, Department of Chemistry & Energy Sciences Institute	Yale University	Electrocatalytic Systems for Water Oxidation
	Dr. Juan-Pablo Correa-Baena		Understanding and Designing
2/22/2 018	Postdoctoral Fellow, Department of Mechanical Engineering	MIT	Interfaces and Defects in Perovskite Solar Cells
	Dr. Liang Zhang		
3/27/2 018	Postdoctoral Research Associate, Department of Chemical & Biomolecular	University of Pennsylvania	Computational Design of Core-shell Nanostructured Materials for Catalysis
3/29/2 018	Dr. James Lee Helen C. Kurtz Chair of the William G. Lowrie Department of Chemical & Biomolecular Engineering	Ohio State University	Nanofluidic Technologies For Cancer Treatment And Regenerative Medicine
4/12/2 018	Dr. Paul Bohn Arthur J. Schmitt Professor, Chemical & Biomolecular Engineering	University of Notre Dame	Biofunctional Nanostructures for Characterization and Control of Single Electron Transfer Reactions
4/19/2 018	Dr. Guangzhao Mao Professor & Chair, Department of Chemical Engineering & Materials Science	Wayne State University	Engineering Gold Nanoparticles for Targeted Drug Delivery and Toxicity Studies
