

**The Chemical & Biomolecular Engineering Department
invites you to our 2022-2023 seminar series:**

Date	Speaker	Topic
September 8	<i>University of Connecticut EH&S</i>	EH&S Student Training
September 15	Dr. Uwe Beuscher Technical Leader <i>W.L. Gore & Associates</i>	Supporting Product Development Decisions in Industry with Modeling & Simulations
September 29	Dr. Lisa Bullard Alumni Distinguished Professor, Director of Undergraduate Studies <i>North Carolina State University</i>	Open the Front Door, Close the Back Door: The Impact of Organizational Culture on Recruiting and Retention
October 13	Dr. Costas Maranas Donald B. Broughton Professor <i>Pennsylvania State University</i>	Reconstructing, Analyzing and Shaping the Metabolism of Bioproduction Hosts
October 27	Dr. Kristala Prather Arthur Dehon Little Professor <i>Massachusetts Institute of Technology</i>	<u>POSTPONED – DATE TBD</u>
November 10	Dr. Drew Gentner Associate Professor <i>Yale University</i>	Total Gas-Phase Organic Carbon Emissions Reveal Missing Understudied Organic Compound Emitted From Oil Sands Operations
December 1	Dr. Jin Ryoum Kim Associate Professor <i>New York University</i>	When Misbehaving Proteins Met Well-Behaved Proteins...
December 15	Dr. Joan Brennecke Professor <i>The University of Texas at Austin</i>	Robust Olefin/Paraffin Separation Membranes

9:30 a.m., Gant North (GN) 20
Refreshments will be served
